ABOUT ME

I'm a computer engineer with a strong passion for developing inovative technologies and applications! I currently am more fluent with Java, C and Javascript, although I'm always striving to learn more, that being one of the main reasons i chose to follow this path for my professional carrer. I am a really good team player as I always try to learn as much as I can from my co-workers.

WORK EXPERIENCE

04/2021 - CURRENT

Tutoring in programming

I am currently giving tutoring sessions to students currently taking the computer engineering bachelor's degree. As teaching was always a big passion of mine, I always try and make the best out of the time I spend with the students, so I can give them the right tools and guide them towards the right path so they can finish every assignment on time and develop great problem solving skills. The feedback from the students has been overwhelmingly positive, and so this is a project of mine I am very proud of.

MANAGEMENT AND LEADERSHIP SKILLS

● Previous experience in project managing

During the 3rd year of my bachelor's degree I acted as project manager for an assignment, taking responsibilities such as meeting all the required deadlines and making sure to review the work done by my classmates beforehand, and, because of that, I also have experience handling documentation related to project development. Had very good feedback from the teacher as well as from all the members in my team.

COMMUNICATION AND INTERPERSONAL SKILLS

● 4 years experience in theater

For 4 years (2014 - 2018) I took part in a project at a local playhouse called *O Teatrão* where I developed a lot of my communication skills. With all of this I got used to deal with crowds and also developed my capability of public speaking.
